

## Subscribe to Calendar (OS X iCal)

Once the calendar is published, you can use your calendar application to subscribe to it.

Select 'Subscribe' from the 'Calendar' menu.

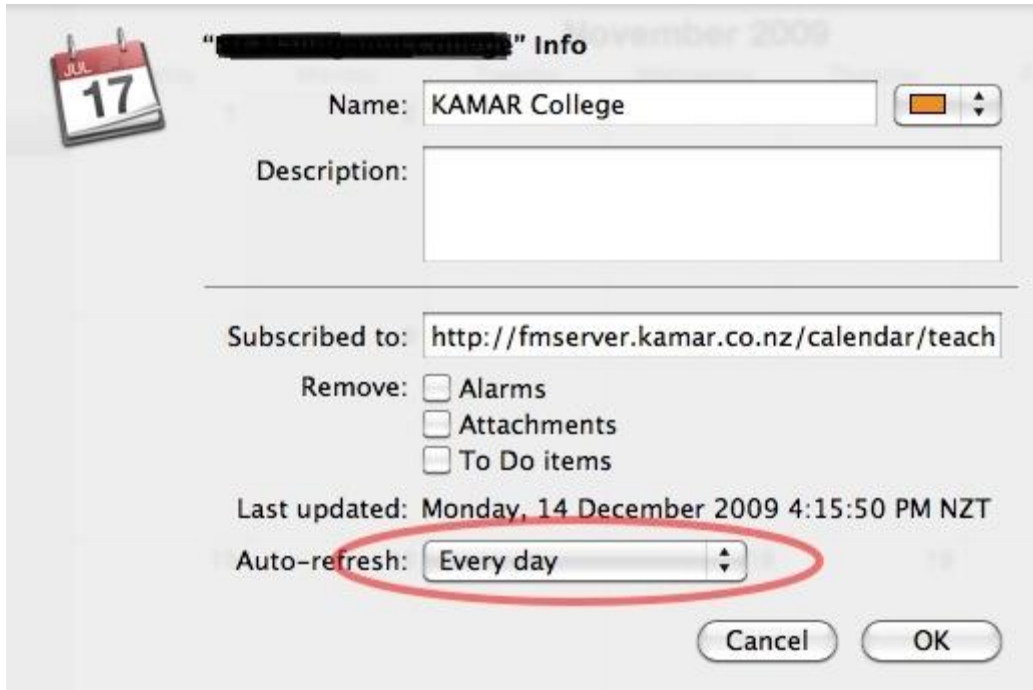

You will be prompted to enter the address where the calendar is published to. You will need to get this information from your school technician. It will relate to the web server address where the file is hosted.

You will then be prompted to confirm the calendar name.

Make sure you set the 'Auto-Refresh' rate as desired - Daily or Weekly should be sufficient, as KAMAR will only be updating the parent file once per day.

If successful, the school calendar will now be available within iCal

Any changes to your schools calendar, should automatically be picked up the following day, after iCal does another synchronise.
